

Array

Designer	Snøhetta
Year	2024-2026

Array is a sofa system designed by Snøhetta to offer maximum flexibility and comfort. It represents a new approach to sofa design and construction, with the goal of reducing environmental impact, achieving customised living solutions, and simplifying logistics. To this end, it introduces small modules, also available in an electrified version with integrated USB ports, which allow a wide variety of layouts, are easy to transport, and can be easily disassembled and reassembled for replacement or recycling. Array coffee tables in a wood finish complete the collection, offering practical surfaces both as freestanding pieces and when placed between the modules. The concept of comfort extends to the entire supply chain, moving beyond its ergonomic component. The Array collection is developed from both a micro and macro perspective and is suitable for residential and contract contexts, both indoors and [outdoors](#).

Frame

The structure is made from an injection moulded base in recycled polypropylene. The process leaves a hollow cavity in the centre in order to use as little material as possible.

The seat and backrest are moulded from 51% recycled polyurethane foam, and designed to maximise comfort. The hidden fastening system is made of glass-filled recycled polypropylene.

Coffee Tables

Veneered wood.

USB-A and USB-C electrification

All modules can be equipped with USB-A and USB-C ports.

For modules without a backrest, specifically the curved pouf module and the curved armrest module, it is possible to select the side on which the electrification is to be installed: the narrow side or the wide side.

Technical info:

- max. USB-A power: 15.5W;
- max. USB-C power: 15.5W;
- max. USB-A + C power: 15.5W;
- output voltage: 5V;
- input current: 3.1 A;
- cable length: 1.8 m.

Cover

Fabric or leather, removable cover.
