

Cosy Curve

Designer	Francesco Rota
Year	2022-2024

Soft, enveloping lines feature Cosy Curve by Francesco Rota. This sofa is characterised by its curved base and backrest, which are ideal for creating convivial atmospheres thanks to their harmonious and welcoming shape. Designed to be the natural focus of fluid spaces in the modern home, its sinuous proportions and curved line offer a pleasant feeling of cosiness and comfort. The Cosy Curve modules, available in different sizes, allow for configurations that create a cosy and relaxed atmosphere, perfect for living rooms and home environments. In combination with the linear modules of Cosy Island, they offer further possibilities for enriching the living space with versatile and dynamic solutions.

Frame

Bearing frame made of solid and multilayer wood, base with elastic belts, feet and concealed hook system. Padding in variable-density foam polyurethane padding and polyester wadding cover.

Light armrest

Fully upholstered, removable cover. Consisting of a plywood poplar wood panel, padded with single-density polyurethane foam, covered with polyester wadding. Frame in epoxy powder-coated metal.

Cover

Fabric or leather, removable cover.

Coffee Tables

Top made of 15 mm thick medium-density wood fibreboard. Frame in epoxy powder-coated metal.
