Duetto, the new stool designed by 967arch for MDF Italia, is characterised by its versatile design and ability to convey the company's essence in a product suitable for both contract and domestic environments. Duetto is composed of two thin metal blades in tension, supporting a sinuous polypropylene seat, creating a harmonious dialogue between materials.
Characterised by essential lines, lightness and a recognisable graphic sign, Duetto is available in two finishes and two heights. This iconic yet functional stool stands out for its strong visual presence, making it ideal as an informal seating option for a variety of corporate, public and private settings.

Frame
The load-bearing structure is made of powder-coated (micro-goffered steel). The seat and footrest are made of glass-filled polypropylene, matching the structure.
360° swivel mechanism available for separate purchase.

## Duetto finishes

### Frame

Matt painted white X053
Matt painted graphite grey X054
