

Lofty chair

Designer	Piergiorgio Cazzaniga
Year	2022

Designed by Piergiorgio Cazzaniga in 2004, Lofty is a seating system in mirror polished stainless steel. A perfect synthesis of technology and craftsmanship, Lofty is the result of a lengthy and meticulous process of studying, designing, and shaping steel, resulting in essential yet sophisticated geometries. For The Principle of Lightness collection, Lofty is reintroduced in its chair version, featuring the original hand-polished steel finish.
