Moodboard

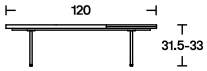

Year	2018
Designer	Massimo Mariani

For his first designs for Acerbis, Massimo Mariani applied the materially-focused approach that earned him the Compasso d'Oro. This led to the creation of a truly exceptional line of versatile coffee tables made from mixed and contrasting materials. Also available as console, the Moodboard low tables includes different sizes and shapes, with tops combining wood, marble, polished steel, and brass. The result is a mosaic of materials, colours, and textures.
Easy to combine to form larger islands of tables for bigger groups, each piece can be complemented with a polished steel or brass tray. This tray functions both as a valet or utility tray and as an integral part of the design and structure when not in use.
